
Beach Head 2000 Free Download Full Version Exe

At the beginning of each level, you are given a limited amount of ammo for each weapon. The strategy of the game largely depends on deciding when and where... And where your room is, in a Pac-man game. For example, several red circles may appear on your path that prevent you from going any further. In this case, you can destroy them to continue the passage - or, if there are too many red circles, you can use another path. If you decide to take a different path, you will not be able to continue through this part of the level. You will find yourself in a mode for those who do not like the so-called "hard levels".
